What is
DARIAH?

DARIAH:

DARIAH supports digital research in the arts and humanities. Our members provide digital tools and share data as well as know-how. [Learn more about DARIAH](#)

a Matter of Link(s)

Members
and Partners

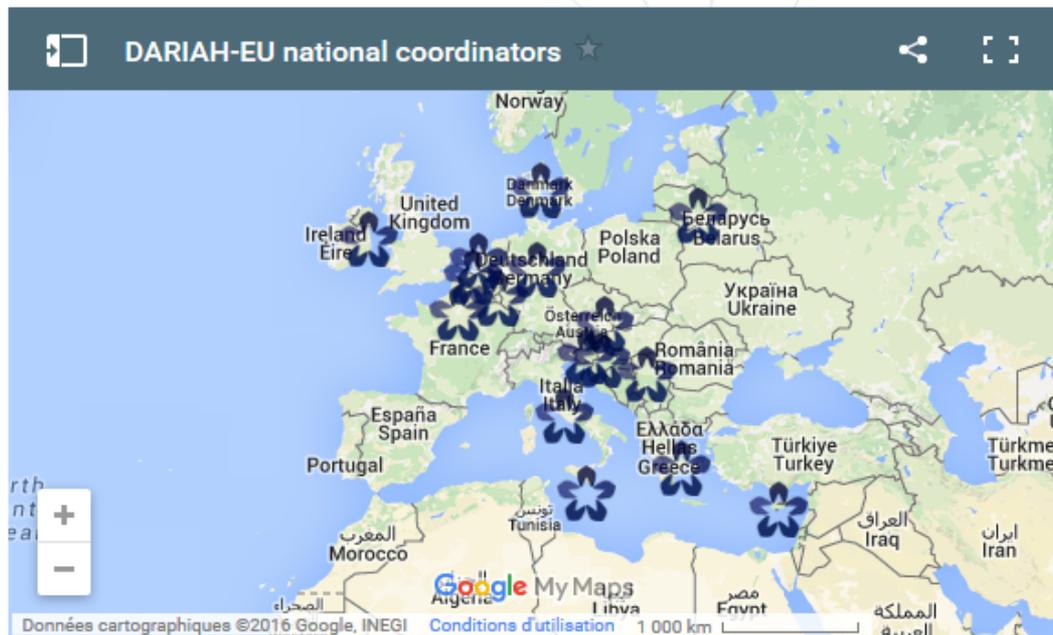

DARIAH is a network: It connects hundreds of scholars and dozens of research facilities in currently 18 countries. [Discover who they are](#)

On 15 August 2014, DARIAH was established as a [European Research Infrastructure Consortium \(ERIC\)](#). This European legal entity is an important first step in facilitating the long-term sustainability of our work for the European arts and humanities research community and beyond.

The Founding Members of the DARIAH-ERIC are Austria, Belgium, Croatia, Cyprus, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, Malta, The Netherlands, Serbia and Slovenia.

France is the host country of the DARIAH-ERIC.

DARIAH Members are countries (EU Member States and Associated Countries) or intergovernmental organisations. Alternatively, institutions from countries who are not yet DARIAH Members can participate as Cooperating Partners. Countries, interested in DARIAH, but who are not yet ready to join as Members can participate as Observers.

Master of Digital Humanities (Leuven)

Master of Science

Digital Humanities is a young field of research, focused on the use of computational techniques to support research in the Humanities, Social and Behavioral Sciences. One of the key drivers of the field is the recent availability of large digital repositories within many areas of the Humanities, Social and Behavioral Sciences. These repositories offer the prospect of applying computational visualization, querying and analysis techniques, leading to the discovery of new knowledge and insights. The field also applies new digital techniques to enhance approaches, processes, skills and methods developed and applied in the Humanities, Social and Behavioral Sciences. This includes the use of digital techniques in instructional sciences, the use of digital games in social sciences or the use of digital techniques in on-line publishing.

[Master of Digital Humanities \(60 ECTS\)](#)

Education

Profile

Career perspectives

Admission requirements

Objectives

What is the Master of Digital Humanities all about?

The Master of Science in Digital Humanities helps graduates from **Humanities, Social and Behavioral Sciences** programmes to develop digital competencies that will allow them to add digital dimensions to their own domain expertise. It aims to explicitly link these competencies to research questions, case studies and applications related to the domain expertise of the students.

Graduates of this programme will be able to bring their own domain expertise to a significantly higher level of functionality, using **digital tools** and **techniques**. Building both on the expertise they obtained from the programme and their prior expertise in Humanities, Social or Behavioral Sciences, graduates will be well placed to open many new digital applications to a much wider community. Moreover, those who wish to move to a professional profile involving more advanced digital competencies, are well prepared to do so.

This is an Master's programme and can be followed on a full-time or part-time basis.

Demystifying Digitization: A Hands-On Master Class in Text Digitization

08/30/2016

News

The Antwerp Summer Academy in Digital Humanities 2016 is jointly organized by Digital Humanities Flanders (DHuF) and DARIAH-BE.

DIXIT Digital Scholarly Editions Initial Training Network

Digital Scholarly Editions Initial Training Network

Richard Hadden

Digital Scholarly Editing and Mass Digitisation
National University of Ireland Maynooth
richard.hadden@nuim.ie

Exploring the different methodologies of Scholarly Editing and Mass Digitisation, finding common ground between them (and building bridges when there isn't one); Investigating topic modelling, graphs and automated mark-up.

Aodhán Kelly

Dissemination of digital editions
University of Antwerp (Belgium)
Aodhan.Kelly@uantwerpen.be

Developing a flexible editorial model which will enable dissemination of digital editions in multiple formats for heterogeneous users. This involves research into user needs and an interface design, which will explore the potential use of formats such as tablet apps and ebooks.

Daniel Powell

Social Editing
Kings College London (UK)
dpowell@uvic.ca

This project will focus on how what we think of as editing in a scholarly sense is compatible with globally networked social media, Web 2.0 and platforms, and a public-facing humanities. More specifically, ongoing research will address the foundations of social processes, editing, editions, and quality.

Magdalena Turska

Requirements for a publication infrastructure
University of Oxford (UK)
magdalena.turska@ox.ac.uk

Technology, Standards, Software
Development of a model of reusable components for a publication infrastructure — surveying the existing tools and frameworks, requesting improvements and implementing new components.

Tuomo Toljamo

Document-Centric Editions
Kings College London (UK)
tuomo.toljamo@kcl.ac.uk

Investigating the impact of the availability of high quality digital facsimiles; computational opportunities with digital document image data; role of layout in textual interpretation and transmission; responsible production of editorial tools.

Elena Spadini

TEI and web-based editing tools
Huygens ING (Netherlands)
elena.spadini@huygens.knaw.nl

Editing tools: TEI/XML editors or web-based tools? TEI is a recognized standard, rich, subtle and modular. Web-based tools and crowd-sourcing initiatives provide strong and user-friendly instruments. We will study both approaches and investigate the possibilities of integrations.

Gioele Barabucci

Tool integration in the digital edition
University of Cologne (Germany)
gioele.barabucci@uni-koeln.de

Using computers to search through different copies of manuscripts to find hidden gems; interesting changes that bring to light the intentions and the working methods of authors.

Anna-Maria Schani

Long-term business models in dissemination and publishing
Huygens ING (Netherlands)
annasxan@gmail.com

The project will explore sustainable models of development, publication and dissemination of digital scholarly editions, investigating collaborations between scholarly editors and publishing entities to ensure long-term maintenance, revenue growth and open access to quality digital scholarship.

Elli Bleeker

Digital Architecture and the Role of the Editor: Mapping invention in writing
University of Antwerp (Belgium)
elli.bleeker@uantwerpen.be

Integrating the personal, extant library of an author in a digital edition. Studying the possibilities to encode the complex and dynamic interactions between a literary work and the reading material of an author.

Misha Broughton

Mass digitization data for scholarly research and digital editions
University of Cologne (Germany)
wbrought@uni-koeln.de

Relationship of Memory Institutions and Digital Scholarly Editions, Methods of measurement of quality of mass digitised output, implementation Scenarios for integration of mass digitised content into Scholarly Editions.

Linda Spinazze

Dynamically structured editions
National University of Ireland Maynooth
linda.spinazze@nuim.ie

Crowd-sourced projects such as Letters of 1616 combine the ethos and methods of Scholarly Editing and Big Data. While maintaining the project's collaborative nature and the standards of a DGE, we are investigating approaches that allow a diverse audience to explore and analyse a large textual archive.

Francisco Javier Álvarez Carbajal

Practice and usability of critical editions
École des Hautes Études en Sciences Sociales (France)
francisco.alvarez-carbajal@ehess.fr

Despite the growth of critical scholarly edition projects, DGE still pose many obstacles to editors. By producing a digital edition, my research will elaborate some sort of "white paper" on the needs of critical editors, and assess the "usability" of the produced edition.

About Us

A collaborative network of international Early Stage and Experienced researchers in institutions across Europe. Dixit trains a new generation of textual scholars working in the field of Digital Humanities. We are kindly funded by the European Union and Marie Curie Actions.

Frederike Neuber

Palaeography and Digital Scholarly Editions
University of Graz (Austria)
frederike.neuber@uni-graz.at

The project will explore the possibilities and limits for palaeographical research within the framework of digital scholarly editions. I am planning to develop a model for transcription methodologies that allow for enhanced studies in palaeography and codicology.

Merisa Martinez

Critical transmission aspects / Digital scholarly editing and memory institution
University of Borås (Sweden)
merisa.martinez@gmail.com

Communities of practice/ transmission of skill sets in digital projects, critical digitization theory, sustainability and reuse of data in scholarly digital editions and collections.

Federico Caria

Critical editing as a cultural process
Università di Roma 'La Sapienza' (Italy)
federico.caria@live.it

Analysing the concept and practices of critical editing from the points of view of cultural studies and the sociology of cultural artefacts; studying methodologies for representing textual artefacts that exist in the form of discontinuous, unstable and stratified objects; introducing social and ethnographic perspectives.

IDENTIFIANTS

Overlay Journal Platform

If you can't find the journal for your field, we are interested in working with you to launch it!

- **ARIMA Journal**

The journal is a result of scientific cooperation between Northern and South countries which has been under development since more than twenty years, in the framework of the CARI activities (African Conference for the Research in Computer Science). Its principal goal is to become a channel for disseminating the results of this cooperation. The scientific area includes all research topics in Computer Science and Applied Mathematics.

Scientists working in the mentioned themes are welcomed to submit papers; however particular encouragement is directed to authors that can present results coming from collaboration between Africa and Northern countries or results that were entirely obtained in Africa.

Submitted articles must describe novel research results. Articles focusing on application of existing tools will also be considered for publication as long as they bring new insight on a special domain arising in application problems.

- **DMTCS Discrete Mathematics & Theoretical Computer Science**

DMTCS is a high standard peer-reviewed electronic journal devoted to publication of innovative research which covers the fields of Discrete Mathematics and Theoretical Computer Science and puts a certain emphasis on the intersection of these two fields.

DMTCS exists since 1997 and is in open access since 1998.

With the shift to episciences.org as an open publishing platform, we achieve a new level of organizing open access publishing. This embeds into a high quality administrative, technical and legal infrastructure, that will preserve the scientific work of our community.

- **Hardy-Ramanujan Journal**

The Hardy Ramanujan Journal is a scientific peer-review journal. The HRJ was created in 1978 and publish articles in the field of the fundamentals mathematics and more precisely in number theory.

- **JIPS Journal d'Interaction Homme Machine**

The JIPS journal was created in 2008 by the Francophone Association for Human-Computer Interaction (AFIHM). It aims to encourage the dissemination of research on human-machine interaction by promoting achievements in this field. The journal accepts two types of contributions: research articles and position papers. The journal also publishes special issues.

- **JDMDH Journal of Data Mining and Digital Humanities**

The Journal of Data Mining & Digital Humanities is concerned with the intersection of computing and the disciplines of the humanities, with tools provided by computing such as data visualisation, information retrieval, statistics, text mining by publishing scholarly work beyond the traditional humanities.

- **Journal of Interdisciplinary Methodologies and Issues in Science**

JIMIS (Journal of Interdisciplinary Methodologies and Issues in Science) was created in December 2015. JIMIS is an interdisciplinary international peer-reviewed journal in English and French. It tackles themes and methods shared by different disciplines from exact/experimental and human/social sciences. Under the auspices of an international steering committee, JIMIS publishes targeted issues lead by invited editors with specific editorial committees.

- **Epiga : Epijournal de Géométrie Algébrique**

The *Épijournal de Géométrie Algébrique* is a peer-reviewed mathematical journal founded in 2015. The selection of articles

Welcome to the Manuscript Desk!

The Manuscript Desk is an online environment in which manuscript pages can be uploaded, manuscript pages can be transcribed, and collations of transcriptions can be performed. The Manuscript Desk builds on, and extends different software components used in the Digital Humanities. The project is open-source, licenced under the [GNU License](#). Full installation instructions, and additional information on the technical structure of the software can be found on [GitHub](#). Do you have suggestions or questions, or have you found a bug? You can always reach us at uamanuscriptdesk 'at' gmail 'dot' com.

The Manuscript Desk is currently in its testing phase. Because of this, full access will only be given to persons that are invited. If you want an invite, please mail us at uamanuscriptdesk 'at' gmail 'dot' com. Without this invite you will be able to create an account, but you won't be able to test out any features.

New to this website?

Take a look at the [overview](#) of the features in the Manuscript Desk.

Credits

The Manuscript Desk is primarily being developed at the [University of Antwerp](#), but in close collaboration and with technical support from [Ghent University](#). The project is part of [DARIAH-Belgium](#).

The software components used in the Manuscript Desk include:

- [Mediawiki software](#). MediaWiki software powers [Wikipedia](#), and many other wikis on the web.
- Software created for the [Transcribe Bentham project](#). The Transcribe Bentham project has created several open-source extensions for MediaWiki, which are used, and extended in the Manuscript Desk.
- [Collatex](#) is used to collate different versions of texts.
- [Preloaders.net](#) was used for the loader image.

Biblissima Toolkit (Baobab)

Website under construction...

Expected to go live in autumn 2016

The **Biblissima toolkit (Baobab)** contains a coherent collection of resources, tools, guidelines and tutorials for **collecting and producing data** about **the circulation of texts, the history of libraries and the transmission of knowledge in Europe from the 8th to 18th centuries**.

The toolkit is designed for anyone with an interest in this field, from those who are just starting out to full-time researchers, including teachers and professors, as well as librarians, archivists, curators, etc. Anyone working with medieval documents and manuscripts or early printed books may find it useful, although the primary target group is the people who are contributing to the [Biblissima data cluster](#), for example through **data entry, cataloguing manuscripts and printed editions, or the transcription, edition or translation of texts**.

This website is part of Phase 1 of the Biblissima project: [the Biblissima Observatory](#).

Centre Michel de Bouïard - CRAHAM

Centre de recherches archéologiques et historiques anciennes et médiévales
UMR 6273 (CNRS/Université de Caen Normandie)

E-Cartae

E-Cartae est un outil d'édition scientifique numérique et de publication double support, web et papier, des corpus de textes diplomatiques médiévaux (chartes). Il a été conçu par Grégory Combalbert et le pôle du Document numérique (MRSH, Université de Caen Basse-Normandie), et associe plusieurs chercheurs du Centre Michel de Bouïard-CRAHAM.
